Climbing Plants in Your Garden

LIMBING plants have an important place in every well-planned garden. Having grown the Clematis hybrids for many years and a large number of other kinds of flowering vines, we have come to realize the wide use to which they can be adapted.

Many garden makers think of flowering vines merely as useful plants to screen unsightly areas. We like to think of them as rich, verdant masses of foliage to embellish doorways, porches, pergolas and arbors. In gardens, climbing plants often serve to make a pleasing transition between the house and the garden, or between large trees and small groups of shrubs. Then, more rampant climbers can be used to grow over old tree stumps.

Many of our climbing plants, in addition to interesting foliage and showy flowers, have unusual seed-pods. Both the flowers and the fruits offer unlimited possibilities for indoor decoration.

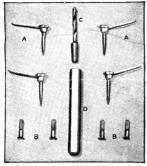

Climbing plants can often be used to solve the problem of ground-covers in difficult areas. Often where there are outcroppings of rock, such climbing plants as Honeysuckle (in all its forms), Euonymus, and Bittersweet, can be introduced to clothe bare areas.

Flowering vines trained on arbors and pergolas often serve to frame an interesting vista which can be enjoyed by the home-owner or the passerby. In summer, when flowering plants are not abundant, climbing plants add to the interest of the garden and often serve as a pleasing background for shrubs, perennials, and annuals. Walls and wire fences make admirable supports for this valuable group of plants.

ORNAMENTAL VINES will be sent postpaid east of the Mississippi if the order is included with a Clematis order.

Plants shipped west of the Mississippi will be sent Express Collect.

vyn-tach hooks

These are deal for attaching climbing roses and vines to masonry or to wooden surfaces.

Vyn-Tach Hooks for masonry. Complete set of 25 Hooks, 25 shells, with

drill and drill-holder, \$2.00.

EMBOSSED METAL LABELS. (Made to order.) 5 cts. each.

STERILIZED SOIL with peat moss and plant-food thoroughly mixed in. 100 lbs. \$1.00; 50 lbs. 65 cts., f.o.b. Fairport. Shipment by freight.

ARISTOLOCHIA SIPHO (Dutchman's Pipe) 75 cts. each

These strong tapes TWIST-EMS' are reinforced with wire and make useful plant-ties for annuals, shrubs, vines and perennials. They are dark green in color and no twine or raffia will be needed.

> 4-in., 25 cts. for 250. 8-in., 25 cts. for 125.

ENGLISH WALL NAILS Wood

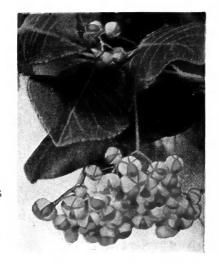

For fastening vines. They are equipped with a soft metal clasp which holds vines well against the wall. Ideal for wood.

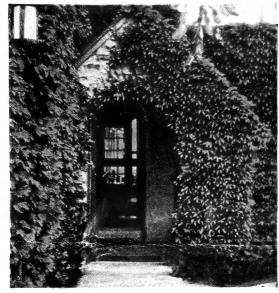

1-in., 4 cts. each. 1½-in., 5 cts. each. 2-in., 7 cts. each.

CLEMATIS PANICULATA GROWING ON PORCH. 50 cts. each

EUONYMUS RADICANS VEGETUS. 35 cts. each

AMPELOPSIS VEITCHI 35 cts. each

LONICERA SEMPERVIRENS 35 cts. each

LONICERA TELLMANNIANA 50 cts. each

AMPELOPSIS aconitifolia. Finely divided glossy green foliage; orange-red berries. A refined vine that needs support for cling. 35 cts. each.

A. heterophylla. Porcelain Ampelopsis. Deeply lobed foliage and clusters of light blue showy berries. 35 cts. each.

A. Lowi. Where delicate tracery is desired on walls, this is an ideal form to use. 35 cts. each.

A. quinquefolia. Virginia Creeper. One of our most vigorous native climbers; noted for its brilliant foliage coloring in autumn. 35 cts. each.

A. quinquefolia Engelmanni. Engelmann's Ivy. Smaller leaves of leathery texture. Noted for its dense growth. 35 cts. each.

A. Veitchi. Boston Ivy. Endures smoky city conditions admirably and clings readily. 35 cts. each.

ARISTOLOCHIA Sipho. Dutchman's-Pipe. The curious yellowish green flowers are always interesting. 75 cts. each.

BIGNONIA radicans. Trumpet Vine. One of our most spectacular summer-flowering vines which grows readily with little care. 35 cts. each.

B., Mme. Galen. Clusters of immense orange-red blooms. Truly spectacular. 75 cts. each.

CELASTRUS orbiculatus. Oriental Bittersweet. The Asiatic form of our native kind valued for its dense foliage and its abundant flowers. 35 cts. each.

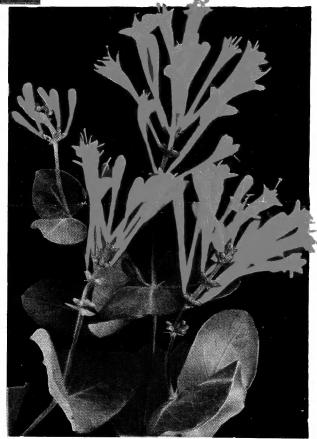

C. scandens. American Bittersweet. A vigorous-growing vine with spectacular orange fruits. 35 cts. each.

Plant VINES for Beauty

THERE is no secret about growing climbing plants. They thrive in ordinary garden soil and usually require no special attention. To be sure, some are more rampant in their growth than others and it is not wise to plant rapid-growing vines in limited areas.

The Ampelopsis, in all its forms, is frequently used on stone and brick houses. For generations, the various forms of Ivy have been much cherished for similar uses, and often they are introduced to soften harsh foundations. Many

of the varieties of Lonicera, or Honeysuckle, in addition to pleasing foliage, have delightfully fragrant flowers. Aristolochia, or Dutchman's-Pipe, is particularly adaptable for areas where quick growth is needed because it makes dense shade. More and more garden enthusiasts are coming to realize the beauty of Climbing Hydrangea and the Silver Lace Vine, *Polygonum Auberti*. Why not plant some vines *NOW*

LONICERA PERICLYMENUM. 50 cts. each

EUONYMUS radicans coloratus. An important form for autumn color effects—the foliage turns brilliant red. 35 cts. each.

E. radicans vegetus. A rapid-growing form which clings readily, with foliage and showy orange fruits in autumn. 35 cts. each.

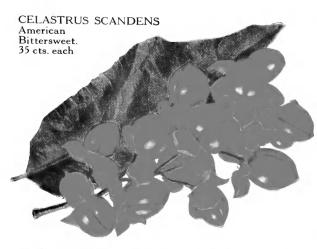

HEDERA Helix, Large Leaf. English Ivy. An evergreen vine that needs no description. Useful as a ground-cover or it can be used on walls and fences. 25 cts. each.

POLYGONUM AUBERTI Silver Lace Vine. 50 cts. each

LONICERA JAPONICA HALLIANA Hall's Japan Honeysuckle. 25 cts. each

Hedera Helix, Small Leaf. English Ivy. A more refined form with smaller foliage. 25 cts. each.

H. Helix, Hahn's Self-branching. A worthwhile form of Ivy which makes an excellent ground-cover because of its self-branching habit and its dense growth. 25 cts. each.

H. Helix, Albany. An upright compact Ivy which is well adapted for ground-cover use or for edgings and low hedges. 25 cts. each.

H. Helix baltica. Baltic Ivy. A small-leaved kind with foliage more delicately cut than the familiar type, it makes delightful tracery effects. 25 cts. each.

HYDRANGEA petiolaris. Climbing Hydrangea. An outstanding early summerflowering vine with great flat panicles of white flowers and enduring foliage. 75 cts. each.

ENGLISH IVY. 25 cts. each

LONICERA, Goldflame. A free-flowering climber with brilliant flame-pink flowers having inner portion creamy golden yellow. 50 cts. each.

L. Heckrotti. An everblooming Honeysuckle with dainty two-toned blossoms which are warm purple outside and bright yellow inside. Blooms freely through the summer months. 50 cts. each.

L. Henryi. Finest species with yellowish flowers and black fruits. 35 cts. each.

L. japonica Halliana. Hall's Japan Honeysuckle. Everybody knows this delightful freely fragrant vine. 25 cts. each.

L. japonica Halliana aurea-reticulata. A variegated form. 35 cts. each.

L. Periclymenum. Dutch Honeysuckle. Clusters of red flowers that are pale yellow within. Thick green foliage with a white undersurface. 50 cts. each.

L. sempervirens. Scarlet Trumpet Honeysuckle. Notable for its clusters of tubulous scarlet blossoms and its brilliant red fruits. 35 cts. each.

L. Tellmanniana. Golden Honeysuckle. Rich yellow blooms shaded bronzy red. 50 cts. each.

POLYGONUM Auberti. Silver Lace Vine. A rampant grower with an abundance of white flowers in late summer. 50 cts. each.

PUERARIA Thunbergiana. Kudzu Vine. A rapid-growing climber with spikes of purple pea-shaped flowers. 25 cts. each.

WISTERIA, Pink Weeping. A choice variety with delicate coloring. \$1.00 each.

W., Purple. Grafted plants are offered since they mature and bloom sooner than plants raised from seed. 50 cts. each.

W., White. This form has a beauty all its own. 50 cts.

WISTERIA, Purple. 50 cts. each

CLIMBING HYDRANGEA
75 cts. each

JAMES I. GEORGE & SON

EUGENE A. WANDER. 75 cts. each; \$2.00 for 3

CHRYSANTHEMUMS

Acacia. Fragrant bright yellow flowers in graceful clusters. 2 ft. 35 cts. each; \$1.00 for 3.

Apollo. Single flowers of brilliant orange-bronze. $2\frac{1}{2}$ to 3 ft. 25 cts. each; 70 cts. for 3.

Autumn Lights. A coppery bronze Arcticum hybrid which is known to be very hardy and blooms early. 1½ ft. 35 cts. each; \$1.00 for 3.

Burgundy. Double, fragrant blooms of rich burgundy-red. An outstanding variety. 2½ ft. 35 cts. each; \$1.00 for 3.

Caliph. A small, double, velvety red variety. 2½ ft. 25 cts. each; 70 cts. for 3.

Country Girl. Soft pink in color and a vigorous grower. 3 to 4 ft. 25 cts. each; 70 cts. for 3.

Daphne. A pleasing old-rose when fully open, the buds are lilac-rose in color. 2½ to 3 ft. 25 cts. each; 70 cts. for 3.

Eugene A. Wander. An extraordinary new hybrid form is this golden yellow beauty which blooms in September. 1½ to 2 ft. 75 cts. each; \$2.00 for 3.

Gleam o'Gold. Primrose-yellow blossoms in generous sprays. 2 ft. 35 cts. each; \$1.00 for 3.

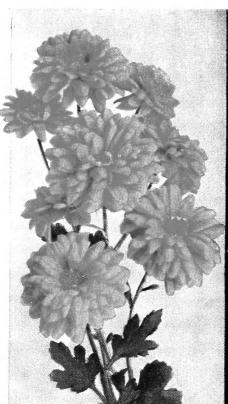

Goblin. A warm golden bronze Pompon type. 2 ft. 35 cts. each; \$1.00 for 3.

Indian Summer. Big glowing orange shaggy blossoms which are much used for cutting. $2\frac{1}{2}$ to 3 ft. 25 cts. each; 70 cts. for 3.

Judith Anderson. Enormous sprays of bright golden yellow blooms. Generally considered the best yellow Pompon. 25 cts. each; 70 cts. for 3.

King Midas. Double bronze-yellow Korean hybrid which blooms early. 2½ ft. 25 cts. each; 70 cts. for 3.

Lavender Lady. A truly outstanding double lavender hybrid of most delicate coloring. 2½ ft. 35 cts. each; \$1.00 for 3.

ROSE GLOW. 35 cts. each; \$1.00 for 3

PALE MOON. 35 cts. each; \$1.00 for 3

ROBERTA COPELAND. 25 cts. each; 70 cts. for 3

AT LAST the Clematis hybrids are getting their share of attention in the garden world. Although many varieties were known in this country in the 90's, they were forgotten for some curious reason. It is only within the last few years that garden makers have been made to realize the beauty and the value of this great plant family.

No group of climbing plants is more distinctive for its wide color range, its variety of forms, and its decorative possibilities. To be sure, the Clematis is a regal plant but it need not have a spacious setting. In fact, its greatest charm is the pleasing suggestion of informality which it lends to pergolas, trellises, arbors, fences and old tree stumps.

Clematis Coccinea Hybrids

A truly distinct group with flowers of trumpet-, bell- and urn-like like forms. The plants are medium in height and bloom in summer and autumn, the flowers appearing successionally on summer shoots.

Date of Bloom Each

Admiration. Glowing salmon-pink coloring....July, Oct. \$1 50

Countess of Onslow. Brilliant violet-purple....July, Oct. 1 50

Duchess of Albany. Bright pink, trumpet-shaped flower. (See illustration above.)...........July, Oct. 1 50

Grace Darling. A delicate carmine-rose form....July, Oct. 1 50

Texensis. Usually described as pitcher-like in

Clematis Florida Hybrids

(See illustration above.)......July, Oct.

form, the brilliant red flowers have yellow centers.

These varieties are noted for their profuse bloom in early summer, reaching a height of 8 to 10 feet. The flowers are produced on old or ripened wood. We must point out that it is necessary to remove only dead and weak growth when pruning.

Clematis Jackmani Hybrids

These large-flowered climbing forms produce their bloom in summer and early autumn successionally on new and summer growth. The plants reach a height of 10 to 15 feet and are noted for their profuse bloom.

| reddish-plum-violet variety. (See color illustra- tion above.) | 1 25 |

In order that garden makers shall have a more complete picture of the decorative possibilities and uses of Clematis, we are endeavoring to point out the distinctive colors and the blooming period of all the varieties which we list. Our blooming dates are based on observations made here at Fairport in the western part of New York State. As with most plants, the first display of bloom is more profuse than the autumn display. Then, too, it is important to realize that some varieties produce blooms on new wood and some produce their flowers on old wood. Accordingly, we are presenting the flowers in groups according to type so that you may readily become familiar with all of the varieties.

Clematis Lanuginosa Hybrids

Often spoken of as the woolly-leaved Clematis, the original form came to us from China almost a hundred years ago. These climbing forms produce large flowers in summer and autumn, usually on short lateral summer shoots. The flowers are well dispersed on the plants which reach a height of 10 to 12 feet.

A CLEMATIS PLANT READY FOR SHIPMENT

CLEMATIS JACKMANI. Perhaps one of our most popular climbing plants, it has been widely used to adorn porches, trellises, arbors, gateways, and walls. The richly colored flowers, the pleasing foliage and the interesting seed-pods make it a valuable plant in the landscape. \$1.00 each.

It is important to remind our garden-minded friends that all our plants are grown in sterilized soil to eliminate the damage done by nematodes or eelworms. By taking this precaution it is possible to ship all plants free of disease. Each plant is carefully packed for shipping as indicated in the illustration opposite, and complete planting directions are sent with each order.

Clematis Viticella Hybrids

The original form was introduced from Spain nearly four hundred years ago. Because the plants produce their flowers on summer shoots they can be pruned vigorously in early spring. The blooms are decidedly large, appearing in summer and autumn on plants 10 to 15 feet in height.

Clematis Species

For the most part, the species and varieties listed here are small-flowered types producing their flowers in summer and autumn, usually on summer shoots, hence they can be pruned vigorously in early spring.

| , | CLEMATIS SPECIES, continued | |
|---|---|--------|
| | Flammula. A sweet-scented, small, white-flower- | Each |
| | ing form. It is hardy south of Washington Sept., Oct. | \$0 50 |
| | Integrifolia. A dainty form indeed. The plants | |
| | are ideal for the foreground of a perennial border | |
| | and reach 2 feet in height. Flowers are a velvety | 50 |
| | gray-blue with deep blue coloring on the outside. June, July Jouiniana, Spingarn. A very profuse bloomer is | 50 |
| | this vigorous climbing form which reaches 15 to | |
| | 18 feet in a season. The fragrant pale lavender | |
| | flowers are borne in long clusters and the plant is | |
| | most appropriately named for the late J. E. Spin- | |
| | garn who did much to popularize ClematisAug., Sept. | 1 25 |
| | Macropetala. This native of northern China and | |
| | Siberia is usually called the Downy Clematis. The 3-inch flowers are of exquisite lavender color- | |
| | ing with 2 rows of sepals and the whole flower is | |
| | covered with down. 8 to 10 ftJune. Aug. | 1 50 |
| | Montana alba. A white form of the great Indian | |
| | Clematis. It grows 10 to 15 feet in heightMay, June | 1 00 |
| | Montana rubens. The rosy red flowers turn pink | 0.5 |
| | with age. 10 to 15 ft | 85 |
| | illustration above.) 10 to 15 ft | 85 |
| | Mrs. Robert Bryden. Pale watery blue flowers in | 0,5 |
| | clusters characterize this vigorous new hybrid | |
| | which reach 15 to 18 feet in heightJune, Oct. | 1 25 |
| | Paniculata. It is hardly necessary to more than | |
| | mention this small white star-shaped flowering form which is known everywhere. 15 to 18 ft Sept., Oct. | 50 |
| | Recta. A shrubby form which flourishes in the per- | 20 |
| | ennial border. The clusters of white flowers are | |
| | produced on 3 to 4-foot stemsJune, July | 50 |
| | Recta mandschurica. A hybrid form with larger | |
| | flowers than the type. 3 to 4 ftJune, July | 50 |
| | Spooneri rosea. An abundance of deep apple- blossom-pink flowers on plants which reach 10 to | |
| | 15 feet. A great favorite in English gardens May, June | 1 25 |
| | Tangutica obtusiuscula. A curiously interesting | 1 2 |
| | yellow-flowered form with tiny lantern-like | |
| | blooms. Plants are unusually vigorous, reaching | 0.5 |
| | 15 to 20 feet in height | 85 |
| | known for its vigorous growth, reaching 15 to | |
| | 18 feetSept., Oct. | 50 |

ON GROWING CLEMATIS

SOIL. A rich well-drained loam, loosened by the addition of sand or peat moss, is best. Make certain that the collar of the plant is set 2 to 3 inches below the surface of the soil. Firm the soil well around the roots. Water frequently in dry weather.

LOCATION. A partially shaded location with 5 to 6 hours sunshine is ideal. If planted in full sun provide a cool root-run by a good summer mulch of some loose material such as peat, straw, rotted manure, etc.

FERTILIZING. Well-rotted manure is preferred with any well-balanced plant-food as a good second. Work it well into the soil without disturbing the roots. Use a little lime occasionally.

TRELLIS. Provide a support at once—a trellis, wire netting, old stumps, low shrubs, or stone walls.

WINTER MULCH. With fall planting of Clematis use a mulch of straw, leaves, or peat moss for the first winter to prevent the soil from freezing and thawing, which sometimes damages the stems if they are unprotected. Mice and rabbits may be kept from eating the tops by hilling the soil up around the stems or by putting small screens around them. A winter mulch is cheap protection for Clematis anytime.

Plant CLEMATIS NOW

Clematis hybrids planted now will bloom this year. Get them into the ground as early as possible so that they can become well established. You will be delighted with the pleasing tracery of the stems and foliage as well as the spectacular coloring of the bloom.

Postage Charges West of Mississippi River

1 plant 15 cts.
2 plants 26 cts.

3 plants 37 cts.
4 plants 48 cts.

5 plants 59 cts.
6 plants 70 cts.

NELLY MOSER USED ON A PILLAR

GROWN IN POTS

Potted specimens of Clematis can be used as decorative features on trellises, porches, and patios. In fact, there are many small gardens where potted plants can be used to great advantage.

A 6-inch pot is large enough to hold an average-sized plant, and a mixture of 3 parts gritty loam, and 1 part leafmold or lime is usually satisfactory. Of course, drainage must not be neglected, and moderately firm potting suits the plants best.

To protect the crown of the plant, a bamboo cane, a wire trellis, or a wooden frame of some sort should be used so that the plants will have ample support.

> DUCHESS OF EDINBURGH \$1.00 each

STRONG 2-YR. OWN-ROOT PLANTS

- Shipped at proper planting-time.
- Wrapped with soil on the roots fresh for your order.
- Postpaid east of Mississippi River.
- Planting instructions with order.
- 61 varieties of Clematis.
- Order Blank enclosed.
